

Waffles — World Cup 2026 Campaign Plan

1 • Executive summary

The World Cup is a six-week window where hundreds of millions of people care about the same thing at the same time, every day. Trivia is the lowest-friction way to convert that attention into daily, repeatable actions for our users. Waffles will turn that attention into hourly live games themed on the world cup and prizes.

Match of the Hour — live tournaments

Every hour, thousands of players face the same set of football questions at the same time. Answer fast for more points; standings are provisional until the round closes, then scores lock and prizes settle. One entry per round keeps it fair and creates a clean, repeatable appointment to return.

Football question formats

Beyond classic multiple-choice, the World Cup pack uses richer formats that suit football:

- **Pick-the-winners** — select the correct set (e.g. nations that have won the Cup).
- **Ordering** — arrange winners or hosts into chronological order.
- **Tap-the-flag / map** — spatial questions on a board of national flags.
- **Trivia bingo** — tap every true statement.
- **Classic timed** — fast one-of-four for pace.

you can find all question formats here: <https://wafflesv2.vercel.app/world-cup>

Content spans winners, hosts, moments, iconic players, and records — refreshed daily and is subtly dynamic to mirror the actual world cup calendar.

Solo level path

Between live rounds, players climb a World Cup-themed solo leveling path at their own pace. It's the free practice ground and where players practice and get rewarded with tickets to join tournaments.
